

Connection Creator

1. Fill in the required input fields.
 - **Organization Name:** Office name / Remote office.
 - *"IDS-Raffles Ortigas"*
 - **Activation Code:** 15 Digit Alphanumeric code.
 - *"HOPWMWTJ1568126"*

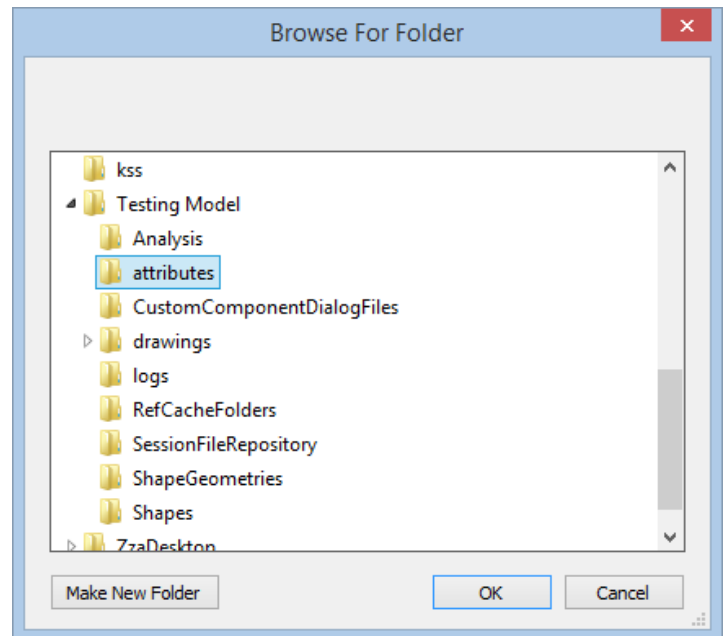

The image shows a dialog box titled "Activation" with a close button (X) in the top right corner. It contains two text input fields: "Organization Name:" and "Activation Code:". Below the fields are two buttons: "Activate" (in blue) and "Close" (in grey).

2. Select location of excel template and output directory of j files.

The image shows a window titled "Connection Creator (j attribute creator) 1.0.0" with a close button (X) in the top right corner. It contains two text input fields: "Excel template:" and "Output directory:". To the right of each field is a button with three dots (...). Below the "Output directory:" field is a small text example: *(ex. X:\IDS_Model\Beauce Atlas, Inc\15830_PTB_BeauceAtlas_TS21.0SR1USImp\attributes)*. At the bottom left are links: "Check for Update | Help | Get template". At the bottom right are two buttons: "Create" (in blue) and "Close" (in blue).

3. Location of j files can directly locate under “Model/attribute” folder.

Wait until j files are being created.
